Visit details

Date	Duration

Instructions

This form is intended to help you keep track of which species you have recorded in your tetrad. Please use one copy for each tetrad in each breeding season (April to July), completing the tetrad identifier (e.g. T L 0 0 A), the name of any OS map feature within the tetrad (e.g. Flaunden), your name and the year (e.g. 2008) at the top right.

For each species observed *using* the tetrad, enter the breeding category code in the appropriate column and seek to upgrade that status as the season progresses. By *using* we mean anything other than simply flying over (F), on migration (M) or a summering non-breeder (U). We do not require dates, but please enter dated records on the Bird Atlas 2007-11 website (www.birdatlas.net) or submit them on Bird Atlas 2007-11 Roving Records forms.

To help us measure the amount of effort given to each tetrad please record visit dates (including *Timed Tetrad Visits*) and durations on the left. Visits of less than 30 minutes do not need to be noted. Further information, including a copy of this form, is available at the Hertfordshire Bird Atlas website (www.hertsatlas.org.uk).

Please provide your contact details below and return this form and any Bird Atlas 2007-11 Roving Records forms at the end of the season to your 10km Square Co-ordinator or the atlas organiser, Chris Dee, at 26 Broadleaf Avenue, Bishop's Stortford, Herts CM23 4JY.

Have these records been entered online at www.birdatlas.net? _____
