Date	Duration

Instructions

Please use one copy of this form for each tetrad in each winter (November to February), completing the tetrad identifier (e.g. T L 0 0 A), the name of any OS map feature within the tetrad (e.g. Flaunden), your name and the recording season (e.g. 2007 / 08) at the top right.

For each species observed using the tetrad, enter the date it was first seen (e.g. 15/11). By using we mean anything other than simply flying over, so Kestrels hunting on the wing count, but Cormorants passing over do not. If you have made a Timed Tetrad Visit to the tetrad you can write "TTV" for species seen at that time. Counts are not needed for Roving Records. To help us measure the amount of effort given to each tetrad please record visit dates (including Timed Tetrad Visits) and durations on the left. Visits of less than 30 minutes do not need to be noted. Further information, including a copy of this form, is available at the Hertfordshire Bird Atlas website (www.hertsatlas.org.uk).

Please provide your contact details below and return this form at the end of the season to your 10km Square Co-ordinator or the atlas organiser, Chris Dee, at 26 Broadleaf Avenue, Bishop's Stortford, Herts CM23 4JY.
